Dear Mr. Fowler:

Re: Spill #03-06201, Stewarts Shop #271
Route 50, Burnt Hills

This office has reviewed the Tank Closure Report dated November 17, 2003, submitted on your behalf by Passaretti Geological. Based on the post excavation soil sample results, this office is requiring no further action at this time. However, be advised that the groundwater influent sample collected just prior to shut down of the on site dewatering system did not meet standards. Therefore, be advised that residual contamination may still exist at this site and this letter does not relieve Stewarts of any liability should unforeseen problems arise in the future as a result of any residual contamination associated with this spill.

I can be reached at 357-2394, if you have any questions. Thank you for your attention to this matter.

Sincerely,

Keith D. Goertz, P.E.
Env. Engineer 2
